Job objective

As a current graduate of degree in computer science at the University of Savoie, France, I am actively seeking a challenging full-stack developer position within a dynamic and innovative high-tech company. With a solid foundation in application development, software architecture, web application and database management. My fervor for crafting inventive IT solutions, coupled with a resolute commitment to overcoming technical challenges, positions me as a dedicated and valuable asset to contribute meaningfully to the company's objectives.

Experiences

From April 2023 To June 2023

Genesii, Poisy, France
(Web Development, 10 employees)
I undertook a complete project to design and implement a Symfony-based website.

From June 2022 To August 2022

Commercial employee, Saint-Félix, France
(Grocery retail, 20 employees)
My tasks involved comprehending various shelving products and their attributes, identifying customer needs, and crafting and presenting customized solutions. Additionally, I provided product information and guidance to customers, and oversaw the management of stocks.

Group Project Replica : Club Med Website, IUT annecy, France
(university, team of 4 members)
In charge of reproducing and enhancing the Club Med website, using C# for backend API C# development and Vue.js for front-end enhancements.

Educations
